

For
Small
Business

An Office in a Box – All the communications, capabilities your business needs in one package.

The Cisco® Unified Communications 500 Series for Small Business provides voice, data, video, security, and wireless in one easy to manage solution. Supporting up to 104 phones and voice mailboxes, the Cisco Unified Communications 500 Series offers flexible deployment options based on your business needs.

A critical part of the Cisco Smart Business Communications System, an all-in-one networking and communications solution that enables more efficient and reliable communications among employees, customers and suppliers.

The Cisco Unified Communications 500 Series includes:

A feature rich phone system that offers telephone call processing, voicemail, automated attendant and conferencing functions so you can respond to customers faster and save money on long-distance charges.

Secure communications for voice and data for remote workers and wireless users. An integrated firewall and virtual private networking (VPN) capabilities allows employees to safely access resources from anywhere.

Integrated Smart Applications, such as Cisco WebEx™ PhoneConnect and Cisco Single Number Reach that can help employees collaborate more effectively with partners and customers. Cisco TimeCardView improves productivity by utilizing the IP phone to provide time and attendance information. MonitorView helps you secure physical assets by being able to view multiple video feeds from Cisco PVC 2300 IP Video Surveillance cameras on the your phone screen.

Cisco Unified Communications 500 Series works with the following (sold separately):

- A variety of Cisco Unified IP Phones and Cisco Small Business Pro Series IP Phones, including Cisco IP Communicator softphone and wireless handsets.
- Cisco Unified CallConnectors for integration with Windows PC applications including Microsoft Outlook, Internet Explorer, and customer relationship management (CRM) applications to provide easy access to information your employees need.
- Cisco ESW 500 Series Switches connect additional devices such as desktop computers, phones and video cameras.

Technology you can trust to help your business succeed

Cisco Unified Communications 500 series is a solution that you can count on for advanced voice and data applications for today and as you grow:

- Integrated business productivity applications included
- Collaboration tools such as video and conferencing
- Easy to grow with simplified licensing
- Flexible deployment options
- Remote teleworker capabilities
- Integrated wireless capabilities
- Fully secure remote access
